

TRAINING AND TASTING

Wine Journey for Corporate Executives

Presented by Pinar Akkaya,
Certified Wine Consultant, Level 3, WSET London

CREATED EXCLUSIVELY FOR CORPORATE LEADERS

Were there any moments when you wished you had known more about wine?

Seriously, what is actually the difference between a Chablis and a Chardonnay?

Wine is a culture. Talking about wine is a great conversation starter that connects people. Knowing wine, being able to comment on different wines and making good wine selections are important skills in refined business environments.

When you host an important client during a business dinner, choosing the right wine is an important decision, as it often sets the tone and helps you start an enjoyable business relationship.

We offer wine training sessions for senior level executives and provide them with the fundamentals of wine culture. The training is enriched by wonderful tasting experiences with hand-picked bottles.

You will learn, taste and enjoy it very much. You will feel more confident the next time you talk about wine. You will impress your guests with your wine knowledge and remarkable choices.

With an advanced degree from the world's most renowned wine education school, WSET London, Pinar Akkaya combines her corporate background with her long time passion for wines. Having worked for many years in corporate leadership roles in multinational companies and having launched her own company on communication training, Pinar offers unforgettable wine training sessions exclusively designed for corporate leaders, creating a bridge between these two worlds.
